Here is a dummy Business Requirements Document (BRD) for the web application based on the provided screenshot:

Business Requirements Document (BRD)

Project Name: Spot the Bugs Web Application
Version: 1.0
Prepared By: [Your Name]
Date: [Insert Date]

---

1. Purpose

The "Spot the Bugs" web application aims to allow users to register and participate in a challenge to spot bugs in a given page. This application will collect basic user information and encourage participants to interact with the page while identifying bugs.

2. Business Objectives

- Provide a fun and engaging challenge for users.
- Collect basic user details for future engagement and analysis.
- Ensure proper validation and error handling on the form fields.

3. Scope

This document covers the requirements for the user registration functionality, including the following fields:

- **First Name**
- **Last Name**
- **Phone Number**
- **Country**
- **Email Address**
- **Password**
- **Terms and Conditions**

4. URL

The application will be hosted at the following URL:
[URL]

5. Stakeholders

- **Project Manager**: [Name]
- **Development Team**: [Names]
- **QA Team**: [Names]
- **End Users**: Participants in the "Spot the Bugs" challenge

6. Functional Requirements

The following features are to be implemented in the "Spot the Bugs" web application:

Requirement ID	Description	Priority	Status
FR-1	User must provide a first name during registration.	High	Not Started
FR-2	User must provide a last name during registration.	High	Not Started
FR-3	Phone number must be at least 10 digits and required.	High	Not Started
FR-4	User must select a country from a drop-down list.	Medium	Not Started
FR-5	Email address must be provided and validated.	High	Not Started
FR-6	Password must be between 6 and 20 characters.	High	Not Started
FR-7	User must accept the terms and conditions before registering.	High	Not Started
FR-8	Display a confirmation message upon successful registration.	Medium	Not Started

7. Non-Functional Requirements

- **Performance:** The form must load within 3 seconds.

- **Security:** User data must be securely transmitted and stored, complying with GDPR.
- **Scalability:** The application must handle at least 100,000 concurrent users.

8. User Interface

- The form will have the following fields:
    - **First Name** (Text box)
    - **Last Name** (Text box)
    - **Phone Number** (Text box with number validation)
    - **Country** (Drop-down list)
    - **Email Address** (Text box)
    - **Password** (Password input field)
    - **Terms and Conditions** (Checkbox)
    - **Register Button** (Submit form)

9. Data Validation

- **First Name & Last Name**: Must be filled out (mandatory fields).
- **Phone Number**: Must be a valid phone number (minimum 10 digits).
- **Email Address**: Must be in a valid email format.
- **Password**: Must be between 6 and 20 characters.
- **Country**: User must select a valid country.
- **Terms and Conditions**: Must be checked before submitting.

10. Error Handling

- Display appropriate error messages if fields are empty or contain invalid data.
- Ensure that users cannot submit the form until all fields are validated.

11. Assumptions

- The user has internet access and a device to access the web application.
- The application is only available for use in supported browsers (e.g., Chrome.

12. Constraints

- The application must comply with current data protection laws (e.g., GDPR).
- The design and layout must be responsive for mobile and desktop views.
